SIV course Bohinj, Slovenia

Bohinj lake in Slovenia is one of the most precious, unspoiled pearls one can find. It is situated right in the middle of the Julian alps, surrounded with high alpine peaks and offering an unforgettable panorama. There are three different take off areas, suitable for almost all wind conditions. They are easily accessible, either by a cable car or with the car and with final hikes (in idilic surroundings) between 5 and 20 minutes.

Since you get up to 800 m above the lake, Bohinj is a perfect place to learn more about emergency and rescue procedures, acrobatics as well.

Loop team has a long history of top level paragliding. Beside many XC and competition trophies they are also proud of their acrobatic, SIV and instructing skills. Loop team was behind all Acro cup competitions (acrobatic championship) and high altitude tandem balloon drops (the highest of 8400m). Loop team will guide you to the next level of your paragliding experience.

The course itself consists of three levels, perfectly suiting any pilot.

Level 1 for basic SIV training (B stall, asymmetric collapse ...)

Level 2 for experienced pilots (full stall, spin ...)

Level 3 for those who want to taste basic acrobatic manouvres (SAT, wing over ...).
